

Sustainability Coaching

Mission Statement: To provide business with coaching service related to sustainability, focusing on the environment but incorporating the business as a whole

Integrity

Knowledge

Service

- Sustainability Coaching will arrange to meet with you when it best suits you, at any time of day, any day of the week
- We will come to you. We will make an effort to come to your business and see firsthand what is required
- Sustainability Coaching is a small business friendly consultancy, keeping costs low but service high to ensure a long working relationship
- we will provide a professional report of findings and recommendations to ensure you remain proactive in your business

Sustainability Coaching is a one-person operation that seeks to work with an individual or small company in their sustainability goals. Only every working with one counterpart at a time, I will focus on you and make sure you are getting everything you need, when you need it. My aim is to primarily coach counterparts whilst providing a base from which to progress

Based in Greater Western Sydney, Sustainability Coaching is in place to ensure timely and efficient response to your needs face to face.

I am committed to the best outcomes for your business and making sure that all compliance and regulatory requirements are completed whilst being able to hold your head up high and publicly call out your achievements knowing there is no greenwashing risks.

I want to know your business and help you succeed in whatever you need

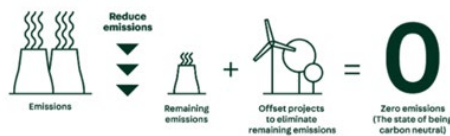

Principle Consultant

Jose Sanz JP

- 5 years' experience in Sustainability
- Master's degree in business (tourism/human resource development)
- Developed first Carbon Neutral Advertising product in Australia
- Familiar with European Extra-Financial Reporting
- Worked in multiple industries including Printing, advertising, hospitality, security

Service Features and Benefits

What it means to be carbon neutral

Carbon Neutrality Assistance

I'll help guide you through the process and develop robust processes and procedures to help you achieve carbon neutrality and maintain it. By implementing a robust reporting and record keeping system you'll be able to develop reduction strategies and report better and on time

Additionally, I can help demystify the process and guide you through it whilst reducing jargon and getting results

Other Services Available

- Business strategy and planning
- Operations efficiency and review
- Waste, water, electricity usage review and strategy for reduction
- Health and Safety incorporation with sustainability strategy
